OBJECTIVE

Data Analyst with hands-on experience in Python, SQL, Power BI, and statistical analysis, with a strong focus on business intelligence, HR analytics, and macroeconomic data. Experienced in building analytical dashboards and models to uncover patterns, quantify impact, and decision support.

EDUCATION

National Institute of Technology Andhra Pradesh 2023–2027
B.Tech in Mechanical Engineering, India GPA: 8.25/10.00

Indian Institute of Technology, Madras 2023–2027
B.S. in Data Science and Applications, India GPA: 7.3/10.00

PROJECTS

Indian Rupee Depreciation Analysis Dashboard Jan 2026
Tools: Power BI, Excel, Power Query, DAX

- Created an interactive analytical dashboard to examine macroeconomic drivers of Indian Rupee depreciation.
- Integrated and modeled multi-source datasets covering exchange rates, foreign trade, capital flows, FX reserves, and inflation.
- Built optimized DAX measures for INR % change, trade balance trends, FX stress indicators, and capital flow impact.
- Delivered insight-driven visuals to assess the influence of oil imports, trade deficit, and foreign investment flows on currency volatility.

Gender Bias in Hiring Promotion Analysis July-Aug 2025
Tools: Python, Pandas, NumPy, Scikit-learn, Power BI

- Analyzed an HR dataset to identify gender-based disparities in hiring, promotions, compensation, performance, and attrition using Python-based data cleaning and exploratory analysis.
- Applied inferential statistics (t-tests) and logistic regression to quantify salary gaps and assess the impact of gender on promotion likelihood, highlighting potential bias in advancement decisions.
- Built interactive Power BI dashboards to visualize promotion rates, salary distribution, and workforce composition, and proposed data-driven recommendations to improve fairness and transparency.

Sales Insights Dashboard April 2025
Tools: Excel, SQL, Power BI

- Designed an interactive dashboard to analyze monthly sales trends and product performance of the company.
- Used Excel to extract data, MySQL for data cleaning, joining, and Power BI for data visualization and storytelling.
- Built dynamic measures using DAX to track YoY growth, market penetration, and region-wise performance.
- Enabled strategic decision-making by identifying underperforming segments and seasonal trends.

SKILLS

Programming & Analysis: Python (Pandas, NumPy), SQL, DAX
Visualization & BI: Excel, Power BI, Tableau, Google Colab
Databases: MySQL, SQLite
Web Technologies: HTML, CSS, JavaScript, Flask, Redis, Celery
Machine Learning: Linear Regression, Logistic Regression, K-Means, Hypothesis Testing

EXPERIENCE

Data Analytics Trainee April–June 2025
CODTECH IT SOLUTIONS PVT. LTD

- Built 5+ interactive dashboards using Power BI and Tableau, tracking sales trends and operational KPIs.
- Automated Excel workflows to reduce manual data entry by 30%, improving efficiency in monthly reporting.

PASSION & INTERESTS

- Exploring AI tools and automation to enhance analytics workflows and decision support.
- Listening to podcasts focused on data strategy, technology, and real-world problem-solving.
