PROFESSIONAL SUMMARY

Mechanical Engineering undergraduate with a parallel Diploma in Data Science and Applications from IIT Madras, building a strong foundation in data analytics, machine learning.Hands-on experience applying Python, SQL, and BI tools to real-world datasets through analytical and decision-support projects.Exploring modern AI-based approaches for information retrieval.

EDUCATION

National Institute of Technology Andhra Pradesh 2023–2027 B.Tech in Mechanical Engineering GPA: 8.25/10.00

Indian Institute of Technology Madras 2023–2027 Diploma in Data Science and Applications GPA: 7.3/10.00

EXPERIENCE

Data Analytics Trainee Apr–Jun 2025

CODTECH IT SOLUTIONS PVT. LTD

- Developed interactive business intelligence dashboards using Power BI to monitor KPIs and support decision-making.
- Automated Excel-based reporting workflows, reducing manual effort and improving operational efficiency.
- Conducted exploratory data analysis (EDA) and data validation to identify trends, anomalies, and actionable business insights.

PROJECTS

Loan Portfolio Risk Analytics | Credit Risk & Lending Intelligence Repository Jun–Aug 2026

Tools: SQL Server, Python (Pandas), Power BI

- Designed and implemented a Loan Portfolio Risk Analytics solution on 1.04M+ lending records, performing data cleaning, profiling, and transformation using Python (Pandas) and SQL Server Management Studio (SSMS).
- Built a star schema data model with fact and dimension tables, and conducted advanced SQL analysis using aggregations, CTEs, window functions, ranking, and business views to identify key loan default risk drivers.
- Developed an executive Power BI dashboard to monitor portfolio performance, credit quality, borrower risk segments, and lending trends, generating data-driven recommendations based on FICO scores, DTI ratios, income levels, loan grades, and loan outcomes.

HR Analytics Dashboard | Workforce Attrition Analysis Repository May 2026

Tools: Python, Pandas, Excel,Google Colab

- Conducted exploratory data analysis on 1,470 employee records using Python, Pandas, and NumPy to identify attrition patterns, workforce trends, and retention risks.
- Developed an analytics framework incorporating Driver Analysis, Contribution Analysis, Risk Matrix, and Employee Persona Segmentation to support workforce planning.
- Identified high-risk employee segments, including Low Income + OverTime + New Hire groups, with attrition rates reaching 81.25%.
- Generated data-driven retention recommendations by analyzing attrition across 17 workforce dimensions and multiple feature interactions.

Restaurant Market Intelligence Platform | Business Analytics & Decision Support Repository Mar–Jun 2025

Tools: SQL,Power BI, Power Query

- Built an end-to-end restaurant market intelligence platform by integrating data preparation, business analysis, KPI reporting, and predictive analytics on the Bengaluru restaurant ecosystem.
- Designed a dimensional data model and KPI framework to evaluate locality performance, cuisine demand, pricing strategy, ratings, and service availability.
- Performed multivariate analysis to identify relationships between pricing, customer engagement, and restaurant ratings, translating findings into business recommendations.

TECHNICAL SKILLS

Programming: Python, SQL
Data Analytics: Pandas, NumPy, EDA, Data Cleaning, Hypothesis Testing
Machine Learning: Scikit-learn, Supervised Learning, Feature Engineering, Model Evaluation
Generative AI: LLMs, Prompt Engineering, Embeddings,RAG
Business Intelligence: Power BI, Excel, Power Query
Databases: Microsoft SQL Server, SQLite
Tools: Jupyter Notebook, Google Colab, Git, GitHub, Hugging Face

ADDITIONAL INFORMATION

Languages: English (Proficient), Telugu (Proficient), Hindi (Intermediate)
